Subject: Microsoft Settlement

To whom may be concerned,

I strongly favor a settlement between US Government and Microsoft Corporation. We have waste a lot of money and time going for a litigation instead of channeling our resources toward innovations that are going to put our nation ahead of foreign competitions. Somehow in our legal mass we have forgotten that there are plenty of competitions outside our country.

I believe that our government is smart enough to lead us into 21th century that is going to encourage innovations rather than protect the losers in the market.

Sincerely,

Chung
